

## HYTEC AIR VAC (BUG) SCREENS

**Hytech AirVac screens prevent the introduction of debris and insects into pipe venting systems. They are robustly engineered and rust proof giving dependable, low cost protection. The tough UV stabilized fiberglass filled nylon resin bodies are nonconductive and will not contribute to dielectric degradation of piping. Portions of 4" and 6" air vac screens are composed of PVC. The stainless steel mesh screen is permanently fused to the body. Hytech AirVac screens are standard NPT, and thread into or onto pipe.**

**Best practices call for Hytech AirVac (Bug) screens. They are available in #10 / #20 stainless steel mesh and come in the below listed sizes and configurations:**
